

A ruling against Wisconsin's no call list would make phones useless because I have in the past had trouble using the phone because of all of the incoming telemarketer calls. They have also refused to put us on a do not call list when asked to do so. I pay my phone bill so that I can use the phone and not for the use of mass marketers. I feel that it is an abuse of my rights to give this power over my phone to telemarketers.
